

DOCUMENTATION

All **images below are an example** and may not be from this actual asset.

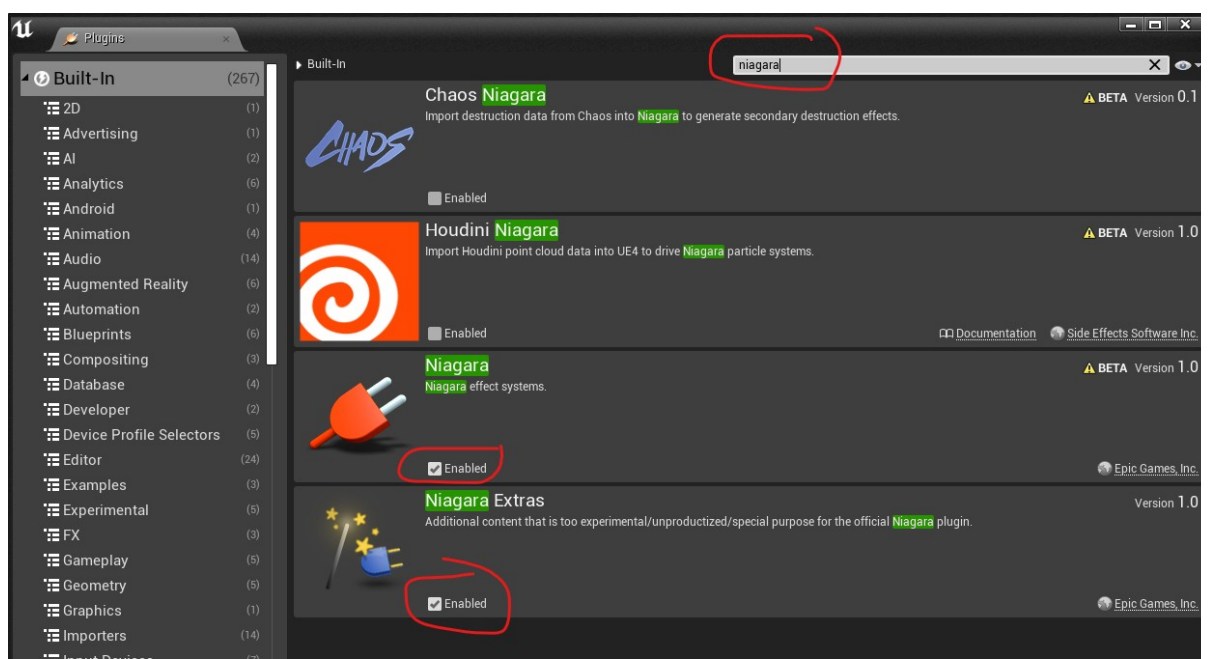

Please contact me via email if any doubts or any problem emerges (check my profile in the Marketplace store);

HOW TO INSTALL NIAGARA PLUGIN (MAY NOT APPLY TO NEWER UE VERSIONS)

- 1) In **Edit**, go to **Plugins**

- 2) Search for **Niagara** in the **Search Bar** and **Enable** Niagara and Niagara Extras.

NOTES

- 1) If the package has any Blueprint, then it's used for demonstration purposes. They are not perfect, this is a VFX Package and I'm a VFX Artist. The focus here is Visual Effects.
- 2) Niagara is a tool that suffers changes through Unreal versions.
- 3) Please contact me via email if any doubts or any problem emerges (check my profile in the Marketplace);
- 4) This asset is entirely made and owned by Gabriel Aguiar Prod.
- 5) Any commercial use requires only proper credits, such as:
VFX Artist - Gabriel Aguiar
